

Amendments to the Claims:

Please cancel claims 3, and 10-25.

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-3. (Cancelled)

4. (Previously Presented) A portable telephone device comprising:

two displays of substantially a same size, positioned so that display content on each of the displays is visible in one field of vision; and

allocation means for allocating a different display process to each of the displays, each display process being a process for outputting different display data including at least one of image data and character data,

wherein the allocation means includes:

a storage unit for storing a table showing a correspondence between each of the displays and the display process being allocated thereto;

a specification unit for specifying a display process to be allocated to one of the displays;

a selection unit for selecting, according to the correspondence shown in the table, one of the displays to allocate the specified display process to; and

an updating unit for updating the table so as to show the correspondence between the selected display and the specified display process;

the specification unit includes:

a detection unit for detecting a call signal,

wherein the specification unit, on detecting the call signal, specifies a display process which outputs display data forming an image showing to a

communication state and which is to be newly allocated to one of the displays; and

the selection unit includes:

a judgement unit for judging, based on the table, whether a state of either of the displays is one of (a) having no display process allocated thereto, and (b) having a display process outputting the display data forming an image of stand-by display allocated thereto,

wherein the selection unit, when the judgement unit judges the state of one of the displays to be one of (a) and (b), selects the display as a display to which the specified display process is to be newly allocated, and

the allocation means allocates the specified display process to the selected display.

5. (Previously Presented) The portable telephone device of claim 4 wherein the selection unit further includes:

a saving unit for saving, when the state of the displays is not one of (a) and (b), data being displayed on one of the displays,

wherein the selection unit selects the display whose data has been saved as a display to which the specified display process is to be newly allocated.

6. (Previously Presented) The portable telephone device of claim 5 wherein the selection unit further includes:

a restoration unit for restoring, on completion of the specified display process, the saved data on the display on which the specified display process has ended.

7. (Previously Presented) The portable telephone device of claim 4 wherein the communication state is one of an incoming-call being received, electronic mail having been received, and a call in progress.

8. (Previously Presented) The portable telephone device of claim 5 wherein the communication state is one of an incoming-call being received, electronic mail having been received, and a call in progress.
9. (Previously Presented) The portable telephone device of claim 6 wherein the communication state is one of an incoming-call being received, electronic mail having been received, and a call in progress.
- 10-25. (Cancelled)
